

Redwater School

...making a difference!

Our School

Redwater School embodies the Sturgeon Public School's vision of a well-rounded education through the arts, academics, athletics, entrepreneurship and citizenship. The Redwater community spirit energizes our hallways and classrooms, embodying the school philosophy of "Making a Difference!" Students from Grades 5 to 12 pursue their unique paths to success.

We offer a wide range of academic and option courses including art, band, business, construction, cosmetology, environmental studies, fashion studies, foods, musical theatre, outdoor education, wildlife and a high school LOGOS class. Knowledge and Employability is available Grade 8 through Grade 12.

Learning choices include Work Experience, Registered Apprenticeship (RAP) and Green Certificate programs. Careful monitoring throughout high school yields excellent achievement and graduation rates. Scholarship and award availability assists many Redwater High School graduates who attend post-secondary institutions in Alberta and beyond.

Positive working relationships and access to our Wellness Hub and counselling services provides support to our students. Volunteer and extracurricular opportunities abound. Activities range from gardening to football and just about everything in between. A real sense of belonging is developed through strong school and community connections via our school HYPE (Helping Young People Excel) team.
